SUPPLEMENTARY INFORMATION

I. Abstract

The Census Bureau's Quarterly Financial Report program (QFR) is planning to expand to include, along with corporations currently surveyed, additional Services sectors in the scope of collection. The current collection includes the Manufacturing, Mining, Wholesale Trade, Retail Trade, Information, and Professional, Scientific, and Technical Services (excluding legal) sectors. The expanded collection will include the Real Estate and Rental and Leasing, Administrative and Support and Waste Management and Remediation Services, Health Care and Social Assistance, and Accommodation and Food Services sectors.

The QFR forms to be submitted for approval are: The QFR 200 (MT) long form; QFR 201 (MG) short form; and the QFR 300 (S) long form.

The QFR Program has published up-to-date aggregate statistics on the financial results and position of U.S. corporations since 1947. The QFR is a principal economic indicator that also provides financial data essential to the estimation of key Government measures of national economic performance. The importance of this data collection is reflected by the granting of specific authority to conduct the program in Title 13 of the United States Code, Section 91, which requires that financial statistics of business operations be collected and published quarterly. Public Law 109-79 extended the authority of the Secretary of Commerce to conduct

the QFR Program under Section 91 through September 30, 2015.

The main purpose of the QFR is to provide timely, accurate data on business financial conditions for use by Government and private-sector organizations and individuals. The primary public users are U.S. Governmental organizations with economic measurement and policymaking responsibilities. In turn, these organizations play a major role in providing guidance, advice, and support to the QFR Program. The primary private-sector data users are a diverse group including universities, financial analysts, unions, trade associations, public libraries, banking institutions, and U.S. and foreign corporations.

II. Method of Collection

The Census Bureau uses two forms of data collection: mail out/mail back paper survey forms, and a secure encrypted Internet data collection system called Centurion. Centurion provides improved quality with automatic data checks and is context-sensitive to assist the data provider in identifying potential reporting problems before submission, thus reducing the need for follow-up. Centurion is completed via the Internet eliminating the need for downloading software and increasing the integrity and confidentiality of the data.

Companies are asked to respond to the survey within 25 days of the end of the quarter for which the data are being requested. Letters and/or telephone calls encouraging participation are directed to companies in the survey sample that have not responded by the designated time.
